Google Sheets, Excel and Cloud
(or local) SQL Databases

WHAT CAN YOU DO WITH IT?

PERSONAL USE

(mostly FREE)

*Create apps for a small number of users
with a basic feature set*

Upgrade your spreadsheets with apps

i.e.

Track your workouts

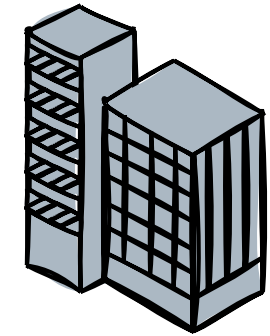

Manage a personal project

Track a goal or challenge

Record your accounts

BUSINESS USE

(fees may apply)

*Replace paper based, spreadsheet based or outdated
expensive software with no-code apps*

i.e.

Field or equipment inspections

Safety inspections

Reporting

Inventory management

*Automating business processes such as order approvals and
user notifications*

the list really is pretty huge... you get the idea...
